

Dummy Inspection Report

Document type: Journal entry with attachments (vedlegg)
Case ID: AW-FS-TEST-2026-001
Journal date: 2026-03-24
Prepared by: Integration Test Fixture
Confidentiality: Internal test data only

Inspection domain	Animal welfare and food safety
Location	Test Farm 12, 9999 Example Municipality
Inspection type	Routine inspection - synthetic data
Participants	Inspector A, Inspector B, Operator Representative

Summary

This report is generated as dummy content for file-upload and journal-entry integration testing. It does not describe a real inspection, a real operator, or real non-compliance. The purpose is to verify handling of a PDF journal entry with two image attachments.

Findings

- Animal housing was recorded as adequate for the test scenario.
- Feed and water access were marked as available.
- Food handling surfaces were recorded as clean in the test scenario.
- Temperature control was marked as within expected range for synthetic data.
- No enforcement action is linked to this document.

Attachments (vedlegg)

No.	Filename	Type	Description
1	attachment_animal_welfare_inspection.png	Image	Synthetic image for animal welfare attachment upload test
2	attachment_food_safety_inspection.png	Image	Synthetic image for food safety attachment upload test

Test note

All names, places, identifiers, and observations in this PDF are invented. The file is intended for automated and manual integration tests only.
